Education

Vishwakarma University

Bachelor of Technology in Computer Science Engineering (CGPA: 8.08)

Expected June 2026

Pune, Maharashtra, India

Experience

MorningBasket

Jan. 2026 – Present

Chief Technology Officer (CTO) — Part-time

Pune, India

- Architected an end-to-end order management system to streamline daily intake, subscriber tracking, and fulfillment.
- Designed structured database schemas using cloud tools to manage delivery routing models and automated vendor operations.
- Automated process workflows for recurring customer payments, logistics routing, and real-time communication modules.
- Collaborated with a 4-person core team to translate complex operational requirements into scalable software features.

AENEXZ TECH PRIVATE LIMITED

Feb. 2026 – Present

Cyber Security Analyst — Internship

Pune, India

- Monitored active network environments and analyzed log files to identify and patch vulnerabilities across test systems.
- Evaluated internal data privacy controls and built minor threat models to safeguard corporate infrastructure.
- Compiled detailed technical risk reports and presented structural security milestones to senior leadership teams.

Edunet Foundation

Jul. 2025 – Dec. 2025

Business Analyst — Internship

Remote

- Built automated Python scripts to evaluate large datasets and translate metrics into actionable operational insights.
- Reviewed cross-functional internal workflows, introducing data-driven models to eliminate manual checking steps.

Projects

Morning Basket Web Ecosystem | TypeScript, React, Node.js, Vercel, GoDaddy

Apr. 2026

- Developed a fast e-commerce platform mapping physical supply chains to programmatic logistics tracking systems.
- Automated customer lifecycle tracking and continuous delivery scheduling data structures for efficient onboarding routing.

Lead-Nexus: Discovery & Pipeline Manager | TypeScript, React, PostgreSQL

Nov. 2025

- Engineered a data portal to organize core operational assets, capture discovery targets, and categorize customer segments.
- Implemented secure client interaction data pipelines, lowering processing latency and organizing metrics cleanly.

SecOps AI Threat Analyzer | Python, Scikit-Learn, BeautifulSoup

Apr. 2026

- Built an enterprise testing engine applying anomaly checking algorithms to analyze complex parameters in high-concurrency loops.
- Automated security health mapping tasks, removing manual validation pipelines through data validation engines.

Technical Skills

Languages: Python, JavaScript, C, HTML/CSS, SQL

Tools & Automation: Git, GitHub, Excel, Google Sheets, VS Code, Vercel, GoDaddy, Postman, Linux

Frameworks & Systems: React, Node.js, Next.js

Core Capabilities: Process Automation, Data Analysis, Workflow Optimization, Security Analysis

Publications, Certifications & Extracurriculars

Journal Publication — AI Summit 2026 | Atharva Meherkar

Mar. 2026

- Published “Deconstructive Data Architecture: A Protocol for Semantic Atomicity and Stateless Reconstruction in AI-Driven Ecosystems” focusing on structural data management transformations.

Professional Certifications

- **Deutsche Bank / Rubicon Foundation:** Training Program: Future Skills for Youth (Aug. 2025)
- **AICTE / Edunet Foundation:** Advanced Course on Green Skills and Artificial Intelligence (Sep. 2025)
- **Google / IBM / Coursera Specializations:** Google Cybersecurity Professional Certificate, IT Fundamentals for Cybersecurity (IBM), Learn to Work with APIs
